

THE FARMING WORLD.

GRINDSTONE DEVICE.

A Cheap and Effective Method of Getting All the Speed Needed.

A correspondent of the Rural New Yorker has devised a contrivance for turning a grindstone, by means of which one can both turn and grind at the same time with comparative ease. The inventor gives the following instructions for constructing the device, which is shown in the accompanying cut:

Take the small sprocket wheels and chain from an old worn binder or other

GRINDSTONE TURNING MADE EASY. farm machinery, and gear it two to one; that is, the lower or crank shaft wheel must have twice as many cogs as the one on the stone shaft. Use a stone 20 or more inches in diameter, and be sure to get a good one. An Amherst is better than a Berea, for all purposes. If geared higher than two to one, it will turn hard, and if much lower it will not turn fast enough. It is the fast motion that cuts. One may find an excellent pair of cranks from some old bicycle; a friend gave me mine.

MANAGEMENT OF SWINE.

Too Many Animals Should Not Be Kept in One Inclosure.

One great fault in the management is to keep too many hogs together in one shed or inclosure. From want of proper protection in the way of housing, hogs are very apt to crowd together in bunches during cold weather; and, coming into the sheds wet and dirty, and being obliged to lie either on old and filthy straw bedding or on a wet and damp floor, their sweating and steaming soon produces a foul atmosphere, and the bedding not being removed at proper intervals, gets rotten, and adds to the contamination of the air. Being thus packed together in the building, the hogs, in a warm and perspiring condition, are next exposed to the influence of cold winds and wet, by being turned out in the morning hours to run in the field among grass wet with cold dew or from rain or hoar frost, or to be fed from troughs in the yard. Among the common consequences are congestion, cold or catarrh, and, if the so-called hog cholera happens to be prevailing, they are almost certain to be affected with that disease, as their systems, under such management, are rendered predisposed or susceptible thereto. In many places the hogs are kept in miserable sheds, no provision being made for proper drainage, the ground sloping toward the sheds, which frequently being unpaved, or without flooring, are constantly damp and wet, while pools of urine and filth abound, and with wind and sleet approaching from all quarters. In proportion as the standard of breeding has become higher, so has the vital force, energy and hardiness become lessened; and the effects of improper quantity and quality of food, filthy or stagnant water, faulty construction of houses, and undue exposure to atmospheric influences, have become proportionately more baneful.—Western Plowman.

Application of Manure.

Some farmers make the mistake of putting coarse, straw manure into wet, heavy soil, thinking that it will have a beneficial effect by making such soil loose and dry and consequently warmer; also that the moisture in the soil will cause the straw to decay more readily than it would in dry land. There are conditions in this reasoning that cannot be brought together. The lumps of wet soil will not mingle with the straw and are held apart so that they dry out and become hard and the manure is not converted into plant food. Put coarse manure on dry soil and it will be mixed and incorporated more readily. Plow it into dry land five or six inches deep and after the seed is covered put a heavy roller over it and the roots will find the manure.—Journal of Agriculture.

Seeding Clover in Knolls.

It is often hard work to get a clover seeding on the dry, elevated knolls in grain fields. Lack of moisture is usually the cause. But the evil may be remedied by drawing a few yards of stable manure and spreading over the knolls. The manure not only protects the young clover plants, but it also holds the moisture in the soil, by checking evaporation. This will soon make them as rich as any part of the field. It is usually the lack of clover seeding on such places that keeps them poor.—Rural World.

Where Geese Are Profitable.

Geese are always profitable for those who have low, wet pastures. On such a pasture geese will thrive better than anything else that is kept on a farm. Geese will also do well on dryer land, but this can usually be turned to better purpose than using it for goose pasture. The truth is that the markets of the west do not do justice to geese. The price is generally fixed at so much a head, when it should be according to weight.—Farmers' Voice.

Oats and peas grown together make a good hog pasture.

SUCCESSFUL FARMING.

Impossible Where Judgment Is Not Cast Along Intelligent Lines.

If every farmer were as enthusiastic on the subject of good methods on the farm as he is about having good and favorable seasons, there would be a great deal less misery in the world. One of the phases of practicing better methods that very few farmers seem to really understand is that of making all operations and transactions of the farm work together to the one end of producing big crops regularly, just as a piece of complicated machinery has all its parts working in harmony, that the machine may do its work effectively. Any crop a farmer may cultivate, or any kind of live stock he undertakes to keep upon the farm, has its relation to other crops or kinds of stock to be cultivated or raised, and this very relation is the thing that should determine the extent to which the farmer is to go with his various operations.

The man with one idea or a sort of hobby, on a farm, generally has a hard road to travel. He works without any of the advantages that flow from smaller economies. It is one thing to make the ends meet, but it is another and better thing to make them lap over. This is what the up-to-date, all around farmer should be constantly doing. He should strive as far as lies in his power to make of the farm a complete home. He must vary his methods, too, to suit the occasion. And this is where the well-informed farmer always has the advantage of those who know little or nothing as to what is passing in the world outside their own immediate neighborhood. It requires knowledge and the exercise of judgment along all these lines for a man to know with anything like precision whether it is best to extend or curtail his operations along certain lines of crop production for any particular year. Jumping at conclusions, or following along in an old rut, is a style of farming that ought not to be permitted in this day and age.

If there is any one expression that describes the successful farmer of to-day, it is that of being up to the times. Other things being equal, this farmer is found in the lead every day and everywhere. Some farmers are always waiting for an opportunity, but there are others who make a business of creating opportunities. A good and favorable season for crop growing is not the only thing that pushes prosperity into a farmer's doorway. Let the farmer follow his best judgment with a look-out for the main chance always, and he is certain to succeed, provided his judgment is cast along intelligent lines.—Dakota Field and Farm.

BOYS ON THE FARM.

They Should Be Taught Self-Reliance from Infancy On.

I am acquainted with an instance where a certain farmer brought his boy up just as you would train a colt. He was never allowed to exercise the least amount of judgment in anything pertaining to farm matters. In fact, he was a mere machine. When the boy was 18 his father was stricken down with a lingering disease, but still the latter persisted in pursuing the course of training his boy. He planned everything until three weeks before his death. To-day his boy knows but little more than an infant about laying out his work.

As soon as the boy is 12 years old his training should begin. Show him that he is of more consequence than a machine, that he is put here to think, plan and carry out work. Give him a piece of ground and teach him the first rudiments of farming, letting him see all the while that he is working for himself. As he grows old, give him a colt or a cow, and let him raise stock for himself. Then take him into confidence as to the buying and selling of farm produce, and occasionally let him manage the farm for a day or so. Above all, be patient with him. Nothing discourages the average boy more than fault-finding, which makes him gradually lose all confidence in his ability to work. Good judgment, patience and self-control will train your boy so that, when at last you are unable to run the old farm, you will have some one who can easily assume the entire management in everything and do credit to his parent's early training.—Orange Judd Farmer.

HANDY PUSH CART.

Anyone Having the Tools Can Easily Make One.

The accompanying illustration shows a push cart that will be found of service in a score of ways about the place. It is a common handcart, with sides and ends of slats so arranged that it may be used, forming an inclosed rack,

A HOME MADE HANDCART.

or the two sides only, when it will be found especially convenient for drawing in green cornstalks from the field, or garden, where one keeps but a cow or two. It is a handy cart for the village resident who has to depend on a wheelbarrow, or some such arrangement as this to move his small crops and other stores. The sides and ends fit tightly into iron sockets, and for stability lock together at the corners when in place, as shown in the portrayal. Anyone handy with tools can construct a very serviceable rig of this sort, the only necessary adjuncts being a pair of wheels, which are often at hand, from some broken or worn-out wagon, silky or other light vehicle.—Farm and Home.

DISORDERED LIVER.

And Inflammatory Rheumatism in a Young Boy.

Mr. and Mrs. Howse Despaired of Their Boy's Life—He Was Compelled to Give Up His Studies.

From the Leader, Cleveland, Ohio.

Few boys withstand an illness so serious a nature as that with which Fred Howse was a year ago afflicted. Fred is now fifteen years of age, and attends the public schools. His home is No. 30 Plymouth Place, Cleveland, Ohio, and he is now a picture of puerile health and vigor. In the fall of 1895, however, his parents, Mr. and Mrs. Richard Howse, the former a well-known business man, whose office is in the Arcade, had almost despaired of saving his life. The lad became afflicted with inflammatory rheumatism which affected his entire body, and accompanying that, painful ailments were several other serious disorders. When she was requested to describe her son's sickness and his recovery, Mrs. Howse said:

"It was in September, 1895, that Fred was up to that time in delicate health, was attacked by inflammatory rheumatism. It was a very acute case for he was confined to his bed, and was unable to move even his arms or legs without bringing on excruciating pain."

"Aside from the rheumatism Fred's liver was in serious disorder, and he used to frequently vomit. He was also subject to fainting spells, and altogether he had a very serious sickness. 'We knew, of course, that though the rheumatism was exceedingly painful, it was not necessarily dangerous; the fainting spells and vomiting, however, alarmed us. Often when Fred fainted he would lay like one dead. His face would become ashen pale and it was difficult at such times to detect his heart beats. These spells came frequently. He was also much nervous about our boy's condition. We called in a doctor and he prescribed for Fred, but the lad did not seem to improve, so I purchased a box of Dr. Williams' Pink Pills for Pale People in one of the downtown stores. Then for four months steadily Fred took the medicine prescribed by the doctor, and at the end of that period—it was about New Year's then—Fred was sufficiently improved to be able to get up."

"The improvement was slow at first, but it was sure. I had unbounded faith in the pills as evidenced by our continued use of them. It was necessary for us to take Fred out of school on account of his illness, but now he has returned and can join in all the sports with his schoolmates, and his health is as good as we could wish. He has never been ill since, and it is pretty safe to predict that he will not be sick again for some time."

"Yes, I have recommended Dr. Williams' Pink Pills to my friends," said Mrs. Howse, in reply to a question, "and many of them have used them since. I first read of the pills in the newspaper. Dr. Williams' Pink Pills for Pale People are now given to the public as an untailing blood builder and nerve restorer, curing all forms of weakness arising from a watery condition of the blood or shattered nerves. The pills are sold by all dealers, or will be sent post paid on receipt of price, 30 cents a box, or six boxes for \$2.50 (they are never sold in bulk or by the 100), by addressing Dr. Williams' Medicine Co., Schenectady, N. Y."

FIDDLIN' JOHN'S VENGEANCE.

How He Made Way with the "Bloody Sixteen" Band.

"Fiddlin' John" Turner was born in Yellow Creek Valley 83 years ago. His father lived to be 103 years old, and he killed three men. He came from Virginia and settled in the mountains of Kentucky on the farm on which "Fiddlin' John" now lives, says the Chicago Record.

"Fiddlin' John," at the age of 83 years, is hale and hearty, and there never was a better fighter, as his history shows. He was a scout under Gen. Morgan during his occupancy of Cumberland Gap and his famous retreat to the Ohio river. One thing about "Fiddlin' John" which makes him so dearly loved by the mountaineers is that there never was a better fiddler in all the mountains. "Fiddlin' John" is noted throughout the mountains because he ended the lives of 16 of the worst mountain desperadoes that ever trod Kentucky soil.

The "bloody sixteen," as this band of desperadoes was called, killed "Fiddlin' John's" brother, Sam, cut his ears off, and nailed him to a tree, and "Fiddlin' John" in turn exterminated the entire band by "bushwhacking" them one after another.

He never received a scratch in all his fighting, and he is very proud of the fact, telling everyone who asks him about his feud:

"I jest got close up 'em, and then bushwhacked 'em."

She—"If you were to find that I had lost all my fortune—every penny of it—would you hesitate to carry out our engagement?" He—"I would hesitate at nothing."—Indianapolis Journal.

Beware of Ointments for Catarrh That Contain Mercury.

Mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is often ten fold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally, and made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free.

Sold by Druggists, price 75c per bottle. Hall's Family Pills are the best.

Home-seekers' Excursion Tickets.

On February 15th and 16th, March 1st, 2d, 15th and 16th, April 5th, 6th, 19th and 20th, May 3rd, 4th, 17th, and 18th, 1897, Home-seekers' excursion tickets will be sold by the Cleveland, Akron & Columbus R'y., to nearly every point in the West, North and Northwest, South and Southwest at rates of about one fare for the round trip.

Parties contemplating a trip will do well to see or write to any C. A. & C. R'y. agent for rates of fare, limits of tickets and full information, or to the undersigned, C. F. Daly, General Passenger Agent, Cleveland, O.

CONVERSATION.—She—"Strange how wet it is!" He—"Be stranger still if it were dry with such heavy rains."—Comic Home Journal.

The Faults and Boilies of the Age.

Are numerous, but of the latter none is more ridiculous than the promiscuous and random use of laxative pills and other drastic cathartics. These wrench, convulse and weaken both the stomach and the bowels. If Hostetter's Stomach Bitters be used instead of these no-remedies, the result is accomplished without pain and with great benefit to the bowels, the stomach and the liver. Use this remedy when constipation manifests itself, and thereby prevent it from becoming chronic.

There are people who would do great acts; but because they wait for great opportunities, life passes, and the acts of love are not done at all.

The report that the inauguration of a new sleeping car line from Chicago to Washington, by way of Cincinnati and Indianapolis, by the B. & O. and connecting lines, was part of a plan of the receivers to abrogate the lease of the Central Ohio Railroad is untrue. The lease of the Central Ohio is to run for 30 years yet, and the road is too valuable as a part of the B. & O. system to be disposed of. The financial troubles, which are now in the courts, will be settled satisfactorily.

JOHNNY—"May I wake the baby, mamma?" Mamma—"Why do you want to wake the baby?" Johnny—"So I can play on my drum."—Woonsocket Patriot.

The B. & O. S. W. Ry., commencing Sunday, January 24th, will inaugurate on trains No. 4 and 3, a through Pullman Buffet Sleeping Car line between Baltimore and Chicago, via Cincinnati and Indianapolis.

This will enable the patrons of the B. & O. S. W. Ry. to make the above named points without the inconvenience of changing cars.

For time of trains and further information call on agents B. & O. S. W. Ry.

There is at least one encouraging sign:

Loafers are less popular than they ever were before.—Atchison Globe.

Specially Remember

That the Cleveland, Akron & Columbus R'y., is still selling round trip tickets between all stations on its line, good going and returning Sunday, at a rate of one fare for the round trip. Ask any agent for particulars, or write to C. F. Daly, General Passenger Agent, Cleveland, O.

A worthless man usually has few possessions, but you can usually depend that a wife is one of them.

No-To-Bac for Fifty Cents. Over 400,000 cured. Why not let No-To-Bac regulate or remove your desire for tobacco? Saves money, makes health and manhood. Cure guaranteed, 50c and \$1.00, all druggists.

We wish we could cash our time for what it seems to be worth to us when a loafer occupies it.—Atchison Globe.

"Star Tobacco."

As you chew tobacco for pleasure, use Star. It is not only the best, but the most lasting, and therefore the cheapest.

Those who are kind, sympathetic, considerate and thoughtful of the pleasure and interest of others never lack friends.

Fits stopped free and permanently cured. No fits after first day's use of Dr. Kline's Great Nerve Restorer. Free \$2 trial bottle & treatise. Dr. Kline, 933 Arch st., Phila., Pa.

As you go forward in life never expect too much, never hope for too little.—Dr. Jowett.

I believe Piso's Cure for Consumption saved my boy's life last summer.—Mrs. Allie Douglass, Le Roy, Mich., Oct. 20, '94.

How My Throat Hurts!—Why don't you use Hale's Honey of Horehound and Tar? Pike's Toothache Drops Cure in one minute.

The people who once claimed to have found their affinity, don't, as a rule, look as if they had found much.

RAILROAD ACCIDENTS.

A Decrease in the Number of Fatalities Last Year.

The record of railway accidents printed every year in the Railroad Gazette shows a decrease of fatalities in 1896, and also demonstrates again how safe a traveler really is on a modern railway train. For instance, 136 passengers were killed last year, but the train mileage was \$34,200,000. This means that on the average a passenger can travel over 6,000,000 miles before being killed in a railway accident; or, to put it in another way, he can travel back and forth between New York and San Francisco as frequently as the train will carry him about 30 years before his fatal accident is due.

It appears from the same authority that about one-quarter as many persons were killed by street car accidents last year as by disaster on the steam roads. There are no data at hand for comparing the two modes of travel, but it seems probable that the steam roads are considerably safer than the trolley cars if the distance traveled be taken into account. The figures do not show how many of those set down as killed by trolley car accidents were passengers and how many innocent pedestrians who failed to get out of the way in time. It hardly seems as if the latter could be included, for the total given for three years for the whole country is only about equal to the list of those known to have been killed by the trolley cars in the city of Brooklyn in that time.

The man who can pay his debts and won't, stands recorded as a thief on the books kept above.—Ram's Horn.

Cold did it. Warmth cures it. Rheumatism is cured promptly by St. Jacobs Oil.

Whatever makes men good Christians makes them good citizens.—Daniel Webster.

While asleep, cured soreness, stiffness? All right, St. Jacobs Oil did it.

We never like a man who is a fancy whistler.—Atchison Globe.

The same old or new rheumatic pains St. Jacobs Oil will cure.

Some people are so mean that they make their politeness disagreeable.

WISE ADVICE TO HUSBANDS.

Those Who Have Ailing Wives Will do Well to Accept It.

Do not wrangle and quarrel, and finally rush into the courts and try to get a separation from your faithful wife; but just stop a moment and think! Your wife, who was even-tempered and amiable, and all that was lovely when you married her, has changed. Now she is peevish, irritable, jealous, discontented and miserable—in a word, she has uterine disorder of some kind.

Law is not the remedy for this condition, she needs medical treatment, her uterine system is at fault.

My advice to you is, sit down and write a letter to that friend of women, Mrs. Pinkham, of Lynn, Mass., state fully and freely the whole case to her and she will honestly advise you what to do. Give your wife that chance, good man!

If you do not wish to write about your wife, bring her a bottle of Lydia E. Pinkham's Vegetable Compound, watch its effects, you will soon see the beginning of the improvement; then get her another and keep it up until she is restored to you, the same lovely woman you married years ago.

Following we relate the circumstances of a case of this nature. Mrs. MELBA ROUTON, of Camby, Ind., says:

"I have used Lydia E. Pinkham's Vegetable Compound and found it to be of great benefit to me. The doctors said I had womb trouble. I had the headache all the time, also a terrible backache, was nervous, cross and irritable. I looked so pale that people would ask me what was the matter. I suffered in this way for about four years, until one day about in despair my husband brought me a bottle of Lydia E. Pinkham's Vegetable Compound. I commenced its use, and much to every one's surprise, it cured me. It has completely changed my disposition for the better also. Several of my neighbors, knowing what the Pinkham medicine has done for me, are taking it, and are much pleased with the result."

CANDY CATHARTIC
Cascarets
CURE CONSTIPATION

10¢ 25¢ 50¢
ABSOLUTELY GUARANTEED to cure any case of constipation. Cascarets are the ideal laxative, never grip or scribe, but cause easy natural results. Sample and booklet free. Ad. STERLING REMEDY CO., Chicago, Montreal, Can., or New York.

Bubbles or Medals.

"Best sarsaparilla." When you think of it how contradictory that term is. For there can be only one best in anything—one best sarsaparilla, as there is one highest mountain, one longest river, one deepest ocean. And that best sarsaparilla is—? There's the rub! You can measure mountain height and ocean depth, but how test sarsaparilla? You could if you were chemists. But then do you need to test it? The World's Fair Committee tested it, and thoroughly. They went behind the label on the bottle. What did this sarsaparilla test result in? Every make of sarsaparilla shut out of the Fair, except Ayer's. So it was that Ayer's was the only sarsaparilla admitted to the World's Fair. The committee found it the best. They had no room for anything that was not the best. And as the best, Ayer's Sarsaparilla received the medal and awards due its merits. Remember the word "best" is a bubble any breath can blow; but there are pins to prick such bubbles. Those others are blowing more "best sarsaparilla" bubbles since the World's Fair pricked the old ones. True, but Ayer's Sarsaparilla has the medal. The pin that scratches the medal proves it gold. The pin that pricks the bubble proves it wind. We point to medals, not bubbles, when we say: The best sarsaparilla is Ayer's.

SOUTHERN HOMES IN TEXAS

In the celebrated Coast Country. Cheap and on reasonable terms. Fruit, vegetable and field crop farms. Great production. Direct markets. Diversified crops. Travel via Prince Line from St. Louis.
